PROFILE

Full stack developer with 3 years of experience, specializing in modern web applications, with a user-first mindset and a drive to build outstanding products. I thrive in feedback-driven teams, leveraging my strong communication skills to achieve a high-performing collaboration.

HARD SKILLS

JavaScript | TypeScript | React | Vue | Next.js | Nuxt.js | Tailwind CSS | C# | .NET | Unity | Node.js | Laravel | PHP | PostgreSQL

SOFT SKILLS

Team work | Attention to details | Intercultural communication | Sociable | Creative | Solution oriented | Adaptability | Client communication

HOBBIES

Books | Boardgames | Tea | Acrobatic sports | Learning Danish

LANGUAGES

Romanian | English

WORK

Full stack developer

March 2024 – Present

UPDIVISION

Romania (Remote)

Achieved 5× faster load times on a client's medical web platform; diagnosed the bottleneck and restructured the system design to get there

Automated content moderation for a social mobile app using OpenAI's classification models, integrated across all user-generated content, including posts, comments, and profile pictures

Enhanced documentation for a game development SDK by building a series of prototype applications demonstrating its real-world usage

Increased delivery speed while following strict coding standards by embracing AI-assisted development workflows

Contributed to code quality and long-term maintainability by writing clean well-structured solutions, refactoring proactively and contributing to system design improvements through code reviews

Technologies: React, Vue.js, Nuxt.js, Next.js, TypeScript, React Native, Node.js, Laravel, PostgreSQL, C#, .NET, Unity

Frontend developer

July 2022 – January 2023

Unbox the Universe (internship)

Belgium (Remote)

Solidified the business-customer connection by building the interfaces for a consumer rewards platform

Bridged theory and practice by applying concepts from my software engineering studies to a real-world product

Technologies: TypeScript, React, Next.js, Node.js, Material UI, REST APIs, Scrum

EDUCATION

VIA University College

August 2020 – January 2024

Software Technology Engineering
Bachelors Degree - Interactive Media

Horsens, Denmark

Built a solid foundation in data structures and algorithms, software design principles, architecture and best practices

Honed strong teamwork and intercultural communication skills through recurring semester projects with international teammates

Gained hands-on experience with in-demand technologies, such as TypeScript, React, Vue, Redux, C#, .NET and Unity
